

Koma Be presents:

HIB Painter

The High Building Painter

Shubhesh Verma, Thomas Dautreppe, Kars Trommel
37-186959, 37-189785, 37-189780

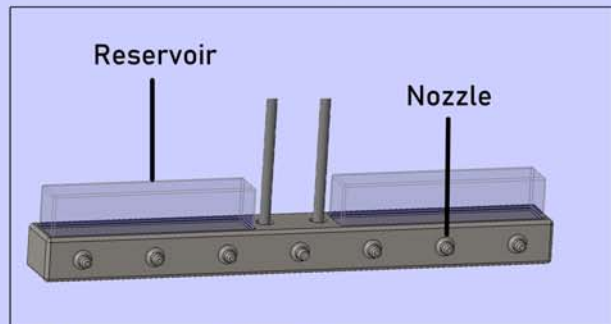

Why?

Safe

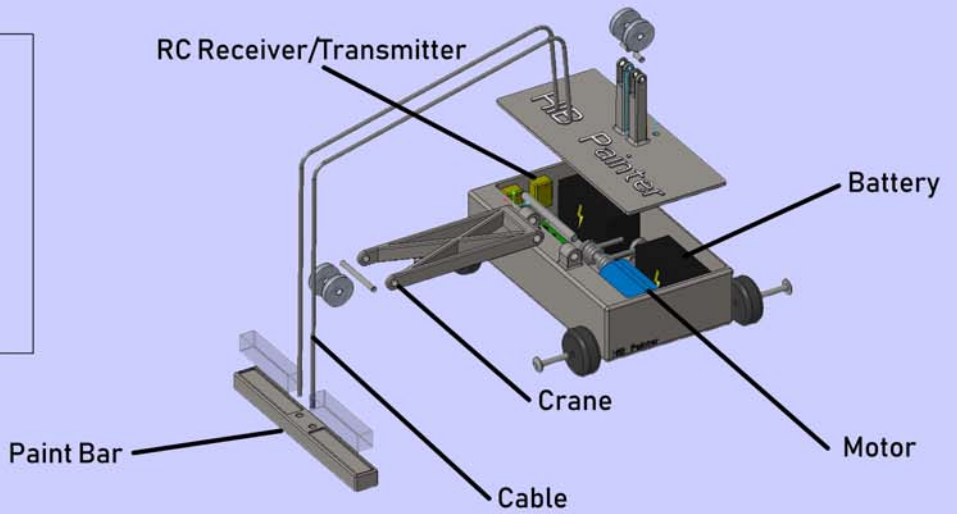

The operator controls the HIB Painter from the ground, so nobody has to be in danger of falling down.

Cheaper

Just one person is needed to deploy and control the HIB Painter, reducing the man-hours and therefore the cost.

Close-up view of Paint Bar

Features

Cleaning

The HIB Painter is also able to clean the building. When the reservoir of the Paint Bar is filled with water, high-pressure cleaning is possible.

Active Vibration Control

When the cart is moving or when the nozzles are opened, different forces are applied on the Paint Bar. These forces cause the Paint Bar to swing. To prevent this, a multi-directional fan system is implemented on the Bar.
